

CIPA 2023 Florence

June 25-30

**Documenting, Understanding, Preserving Cultural Heritage:
Humanities and Digital Technologies for Shaping the Future**

Dear Colleagues and Friends ,

Over the years, the CIPA Symposium has been an important international crossroad for a wide community of researchers, professionals, and site managers interested in documenting, understanding, and preserving cultural heritage. CIPA was founded in 1968 jointly with ISPRS (International Society for Photogrammetry and Remote Sensing) to facilitate the transfer of technology from the measurement sciences into the heritage documentation and recording disciplines. Since then, the biennial symposia have enabled an ever-growing community to meet, debate, network, and get up-to-date. After the very sad and long period that forced us to stay separated, we will meet again in person during CIPA2023 in Florence, from 25-30 June 2023.

Watch the promo!

The main topics in CIPA2023 will be:

- Digital Heritage and Preservation
- Cultural Heritage Risk Assessment
- Documenting Archaeological sites
- Documenting Modern Architecture
- Documenting Underwater Heritage
- Virtual, Augmented and Extended Reality for Cultural Heritage
- Heritage Documentation Training Experiences
- Technologies Changing Education
- Artificial Intelligence and documentation of Cultural Heritage
- Built Heritage Monitoring
- New Technologies for New Museums Accessibility
- Digital Technologies Countering Wars Destruction
- Cultural Heritage 3D reproduction: techniques and methods
- 3D technology supporting Heritage Management and maintenance activity
- Virtual Conservation
- Digital Twins
- Sharing information and 3D data
- Co-creation Communities - Living Labs.

Proceedings

Authors of selected papers will have the opportunity to present their work during the Symposium as long or short presentations. At least one author of each accepted paper must register and present the paper at the conference. Proceedings will collect all the papers that have passed a peer-review process in the ISPRS Archives and Annals. Authors of selected works will be invited to submit an extended version of their papers to Special Issues of journals linked to the Conference (e.g. Applied Geomatics, Ananke, Sensors, Virtual Archaeology Review - list to be updated).
